▲ plastic bag

◆ boy

● girl

■ you

REFLECTION

FEEDBACK

白惠捷

Online teaching was a special but difficult experience for me. Trying to capture the attention of children on the other side of the screen while also maintaining energy, I was very nervous during lessons.

After seeing the kids engaged in the lessons and enthusiastically responding makes me feel really happy!

FEEDBACK

陳建廷

Teaching kids online was definitely a fascinating and very challenging job for me. The difference between online teaching and off-line teaching is that you will have to handle with more technical issues. Despite a couple of technical issues happened to us during the lesson, my teammates and I stayed calm and handled them well and promptly. I would like to thank my teammates for overcoming so much together, from the preparation to the end of this course. We all did a great job.

FEEDBACK

閻亭云

This was my first time teaching a class entirely in English, so the teaching process felt a bit unfamiliar at first. However, seeing the students trying hard to learn and responding enthusiastically gave me a great sense of accomplishment. I believe this online teaching experience was not just an opportunity for the students to learn English, but also a valuable learning experience for me.
